

Use it like an app

Dog Groomer Client CRM — one tap from your home screen

No subscription, no separate app to buy. Your CRM opens full-screen from its own icon on your phone — here is the 2-minute setup.

1

Get your CRM into Google Sheets

On a computer: go to **drive.google.com**, upload the .xlsx file you downloaded, then double-click it and choose **File** → **Save as Google Sheets**. This is your working copy — keep the original as a backup.

2

Install the free Google Sheets app

On your phone, install **Google Sheets** from the App Store (iPhone) or Play Store (Android) and sign in with the same Google account. Your CRM appears automatically.

3

Put it on your home screen

Android: open your CRM in the Google Sheets app → tap the  menu (top right) → **Add to Home screen**. Done — it gets its own icon.

iPhone: open **drive.google.com** in Safari → sign in → open your CRM → tap the **Share** button → **Add to Home Screen**. It opens straight into your sheet, full screen.

4

Use it at the door

Everything updates live — type on your phone, see it on your computer, and vice versa. The Dashboard recalculates automatically wherever you open it.

Tip: it works offline too — in the Google Sheets app, tap  on the file and turn on **Make available offline**.
